

## Appendix 2: Assessment Scheme

- (1) In order to be admitted to the Master's programme, applicants must prove a total of at least 100 assessment points. The assessment points are calculated according to the following criteria:
1. For successfully completed mathematical modules within the framework of a university degree, assessment points are awarded according to the credit points of these modules.
  2. For successfully completed modules in the area of Financial Economics, Microeconomics and Game Theory within the framework of a university degree, assessment points are awarded according to the credit points of these modules.
  3. For successfully completed modules with a high mathematics content (e.g. from theoretical physics or computer science), which have not already been counted under no. 1, assessment points are awarded according to the credit points of these modules.
  4. For a successful Master's degree at a domestic or foreign, state or state-recognised university, 10 assessment points are awarded.
  5. 20 assessment points shall be awarded per year of relevant professional activity in the financial or insurance sector or in a mathematically oriented profession which can be demonstrated beyond the relevant professional activity in accordance with section 2, para. 1, point 3.
- (2) The following rules apply: At least 50 assessment points must be achieved in accordance with para. 1 no. 1. According to para. 1 no. 2 and no. 3, a maximum of 20 assessment points can be achieved in each case. A maximum of 30 assessment points may be achieved through relevant professional activity in accordance with paragraph 1 no. 5.
- (3) If the applicant cannot prove 50 assessment points according to no. 1 and also cannot prove the special admission requirements according to section 2 para. 1 no. 4, the credit points to be provided within the scope of the conditions can be credited against the sum of the necessary assessment points according to no. 1.
